★ SAMPLE — FICTIONAL CLIENT DEMO, NOT A REAL BUSINESS ★

LOS POLLOS HERMANOS · FICTIONAL FRANCHISE SITE · PHASE 2B DELIVERABLE

DESIGN SPEC + THEME PACKAGE

"It's the chicken, man."

Prepared 2026-10-18 · Everything in this document renders from the token set in §1 — no hardcoded colors anywhere.

CONTENTS

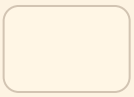

1. Design Tokens — color, typography, spacing, radius & shadow
2. Component Specs — anatomy + behavior for every component
3. Retro-Diner Art Direction
4. Responsive Behavior — 360px / 1280px
5. Accessibility Notes

1 · DESIGN TOKENS

The single source of truth. The build references these tokens by name; no literal color, font, or spacing values appear outside this section.

1.1 COLOR PALETTE

TOKEN	SWATCH	HEX	USAGE	CONTRAST NOTES

`--lph-red`		#B3122E	Primary brand red — headers, hero background, primary CTAs, nav	Cream/white text on red: 6.43 / 6.90 — **AA pass**
`--lph-yellow`		#FFC72C	Warm brand yellow — accents, highlights, badges, CTA on dark sections	Brown text on yellow: 8.08 — **AA pass**. Never white text on yellow.
`--lph-cream`		#FFF6E5	Page background — every page body	Brown text on cream: 11.74 — **AA pass**
`--lph-brown`		#4A2C1A	Body text (dark roast brown); card borders tinted at 12% opacity	Primary text color against cream/white/ yellow — all AA pass
`--lph-orange`		#E87722	Secondary accent — hovers, dividers, stripe motifs. **Decorative only.**	Brown on orange: 4.26 — **no text in orange, ever**
`--lph-red-dark`		#7E0C20	Footer and deep-contrast sections	Cream on red-dark: 9.98; yellow on red-dark: 6.86 — **AA pass**
`--lph-white`		#FFFFFF	Cards on cream	Brown on white: 12.60 — **AA pass**

> **Approved text pairings (AA-verified):** brown on cream · brown on white · brown on yellow · cream or white on red · cream or yellow on red-dark. **Forbidden:** any text on orange; white on yellow; body text below AA at any size.

1.2 TYPOGRAPHY

Exact stacks per brief §5. Google Fonts is progressive enhancement only — every stack ends in a system fallback that carries the design if fonts fail to load.

HEADINGS — `'OSWALD','ARIAL NARROW',SANS-SERIF` · BOLD CONDENSED

DISPLAY 40 — FAMOUS RECIPE CHICKEN

H2 28 — OUR LOCATIONS

H3 21 — CATERING & EVENTS

BODY — `'INTER','HELVETICA NEUE',ARIAL,SANS-SERIF` · CLEAN SANS

Body 16 — Crisp, golden, and unmistakably ours. Every batch of our Famous Recipe chicken is prepared fresh throughout the day, the way it has been since the brothers opened their doors. This is the paragraph size and rhythm for all long-form copy.

Small 14 — Captions, form hints, card metadata.

ACCENT — `'CAVEAT',CURSIVE` · FALLBACK CURSIVE · USE SPARINGLY

"It's the chicken, man."

Reserved for taglines and hand-written-feel moments (hero tagline, pull-quotes). Never for body text, never for navigation, never at small sizes.

ROLE	STACK	SIZE / WEIGHT	LINE-HEIGHT
Display / hero	Oswald → Arial Narrow → sans-serif	56px / 700	1.05
H1	Oswald stack	40px / 700	1.1
H2	Oswald stack	28px / 600	1.15
H3	Oswald stack	21px / 500	1.25
Body		16px / 400	1.6

	Inter → Helvetica Neue → Arial → sans-serif		
Small / caption	Inter stack	14px / 400–500	1.55
Tagline	Caveat → cursive	30px / 700	1.2
Button label	Oswald stack	15px / 600, uppercase, +0.06em	1

1.3 SPACING SCALE

Base unit 8px. Every margin, padding, and gap is a multiple of the base.

TOKEN	VALUE	VISUAL	USAGE
`space-1`	8px		Tight gaps — icon/text pairs, badge padding
`space-2`	16px		Card internal padding (compact)
`space-3`	24px		Component gaps, form field spacing
`space-4`	32px		Card padding (large), section sub-spacing
`space-5`	40px		Mobile section padding
`space-6`	48px		Between content blocks
`space-8`	64px		Desktop section padding

1.4 RADIUS & SHADOW

DEFINITION	RENDERED
`radius-card: 12px` — all cards `radius-pill: 999px` — buttons, badges `radius-input: 8px` — form fields	PILL BADGE

`shadow-card: 0 2px 8px rgba(74,44,26,.08)` — resting state
`shadow-lift: 0 8px 24px rgba(74,44,26,.14)` — hover on interactive cards
`border-card: 1px solid rgba(74,44,26,.12)`

Resting card — shadow-card

1.5 BUTTONS (LIVE SAMPLES)

These are the real buttons — same tokens the site will use.

ORDER CATERING GET A FRANCHISE KIT GHOST ON RED

VARIANT	SPEC	USE
Primary	Pill, red bg, cream text	"Order Catering" CTA on light sections; header CTA
On-dark	Pill, yellow bg, brown text	CTAs inside hero / red-dark sections
Ghost	Pill, 2px cream border, cream text	Secondary action on red backgrounds
Hover (all)	Lift: shadow-lift + translateY(-1px); orange 3px underline sweep on text links	Every interactive element must have a visible hover/focus state
Focus (all)	3px solid yellow outline, offset 2px — always visible against any background	Keyboard users; never removed

2 · COMPONENT SPECS

For each component: anatomy (what it is made of) and behavior (how it acts). Demo blocks below are built only from §1 tokens.

2.1 SAMPLE BANNER

LIVE DEMO

★ SAMPLE — FICTIONAL CLIENT DEMO, NOT A REAL BUSINESS ★

ANATOMY	BEHAVIOR
Full-width ribbon, red-dark bg, yellow Oswald 14px uppercase letterspaced text, centered. Star glyphs both ends.	Fixed to the top of the viewport on every page (every page, no exceptions). Static (non-fixed) in print. Sits above the header in stacking order; header slides under it on scroll.

2.2 HEADER (STICKY)

LIVE DEMO

ANATOMY	BEHAVIOR
Red background bar. Left: chicken-badge logo mark (SVG, §3) + wordmark in Oswald 20px cream, uppercase. Center/right: nav links (Oswald 15px, cream, uppercase). Right: "Order Catering" pill button (yellow on red per §1.5).	Sticky below the SAMPLE banner. On scroll past 120px: bar gains shadow-lift. Mobile (360px): logo + hamburger; nav collapses to a full-width red dropdown panel; CTA button stays visible. Keyboard: skip-link → logo → nav → CTA; Esc closes the mobile menu; focus returns to the hamburger.

2.3 HERO

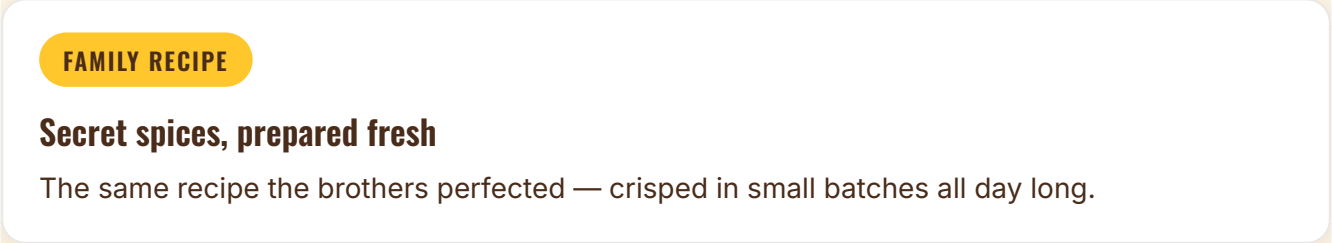

LIVE DEMO

ANATOMY	BEHAVIOR
Red background with SVG sunburst radiating behind the copy (yellow rays at 30% opacity, cream center medallion). Layer order: sunburst → Caveat tagline (yellow, 30px) → Oswald headline (cream, Display 56 desktop) → Inter subcopy (cream, 16px) → dual CTA (yellow primary + cream ghost secondary).	No parallax, no autoplay motion — hero must be legible the instant it paints. Sunburst scales with the container and is clipped (overflow hidden), so no horizontal scroll at 360px. `prefers-reduced-motion`: any decorative rotation freezes.

2.4 VALUE-PROP TRIO

LIVE DEMO — ONE OF THREE

ANATOMY	BEHAVIOR

Three white cards (radius-card, border-card, shadow-card). Each: yellow pill badge (prop label) + Oswald item line + Inter 14px description. Props: Family Recipe · Immaculate Dining Rooms · Catering That Shows Up.	Desktop: three-across. Mobile: stacked, full width. Hover: shadow-lift, no layout shift (shadow only). Cards are not links — no fake affordances; the card CTA row below routes onward.

2.5 MENU CATEGORY CARDS

LIVE DEMO

CHICKEN

8 pc. Famous Recipe	$14.99
Tenders	$9.99
Sandwich	$8.49

⚠ Allergen note: prepared in kitchens that handle wheat, dairy, egg & peanut.

ANATOMY	BEHAVIOR
White card per category (Chicken / Sides / Drinks & Desserts). Category badge (yellow pill) + rows: Oswald item name — dotted leader — Oswald price in red. Allergen note pinned under the Chicken card in red 13px bold. **Menu items live in a plainly-marked editable region** (`<!-- EDIT MENU HERE -->`) a non-technical manager can find.	One category per row on mobile; three-across on desktop. Prices are fictional and right-aligned; row never wraps price under name (min column widths). Editing an item = editing one line of plain text; no classes or markup to touch.

2.6 LOCATION CARDS

LIVE DEMO

Albuquerque, NM FLAGSHIP

1234 Central Ave SE (fictional)
Mon–Sun · 10am–10pm
(505) 555-0148 (fictional)

Get directions →

ANATOMY	BEHAVIOR
White card per location: Oswald city/state line + optional "Flagship" yellow badge; Inter 14px address (marked fictional), hours, phone; red text-link "Get directions →" with orange underline sweep on hover. Three fictional locations: Albuquerque NM (Central Ave — Flagship), Santa Fe NM, El Paso TX. Below the cards: a cream callout — "New location coming: Tucson, AZ."	Cards reorder without code changes — each location is one self-contained block in a marked editable region (`<!-- EDIT LOCATIONS HERE -->`). Directions links open maps in a new tab with `rel="noopener"` . Tucson teaser is a text line, not a card — it must not look bookable.

2.7 CONTACT FORM

LIVE DEMO (CATERING QUOTE FORM)

Name

Email

Please enter a valid email address.

Event date

Number of guests

Message

REQUEST CATERING QUOTE

Franchising instead? **Email the franchise team →** (separate inbox, no form).

ANATOMY	BEHAVIOR
Labels always above inputs (never placeholder-only). Fields: name, email, event date, guests, message. Red pill submit. Inline error text in red 13px bold, linked via `aria-describedby`. Franchise inquiries use a plain email link — separate block, separate inbox, no form.	Inline validation on blur and on submit; error summary moves focus to the first invalid field. `inputmode` set per field (email, numeric). No page reload on error. Success: cream confirmation panel with next-step copy — never a bare "submitted." Keyboard: full tab order, visible yellow focus rings (§1.5).

2.8 FAQ ACCORDION

LIVE DEMO

What are your catering minimums?

Catering quotes start at 20 guests. For smaller gatherings, call your nearest location — we'll make it work. (Fictional policy for this sample.)

How do I get franchise information?

Use the franchise email link on the Contact page — a separate inbox, answered by the franchise team. (Fictional process for this sample.)

Do you handle common allergens?

Our kitchens handle wheat, dairy, egg, and peanut. Tell us about allergies when you request a quote and we'll walk through options. (Fictional note.)

What are your hours?

Every location is open Mon–Sun, 10am–10pm. (Fictional hours.)

ANATOMY	BEHAVIOR
White cards, one per question (4 total: catering minimums, franchise info, allergens, hours). Oswald 16px summary; Inter 14px answer. Chevron/ marker in red.	Native `<details>` — keyboard-operable and screen-reader announced with zero JavaScript. One-or-many open allowed (no forced single-open). Answers fully visible in print (all panels expand via print CSS).

2.9 FOOTER

LIVE DEMO

LOS POLLOS HERMANOS

Albuquerque · Santa Fe · El Paso | Mon–Sun 10am–10pm
Addresses and phone numbers shown are fictional.
SAMPLE — fictional demo. Not a real business.

ANATOMY	BEHAVIOR
Red-dark background, cream text. Columns: brand line, fictional locations + hours, quick nav, catering CTA. Microcopy line in yellow bold: "SAMPLE — fictional demo. Not a real business."	Footer is the trust anchor: the SAMPLE microcopy is never optional and never hidden below the fold on mobile. Nav links mirror the header; nothing in the footer exists that isn't reachable from the header.

3 · RETRO-DINER ART DIRECTION

The one-line brief: a 1962 roadside diner, redrawn in flat vector — chrome-red optimism, mustard-yellow neon, cream formica. Warm, not kitsch. The chicken is the hero; everything else is the tray it sits on.

- **Sunburst:** reserved for the hero and the logo medallion. Yellow rays at ≤30% opacity on red — present but never loud enough to fight the headline. Constructed in SVG (12 rays at 30° intervals); no raster images anywhere.
- **Stripes:** diagonal yellow/orange repeating stripes (45°, 14px bands) as section dividers only — the divider used between sections of this very document. Never behind text.
- **Logo badge:** circular medallion — red field, yellow ring, cream chicken silhouette in SVG. Flat, two-tone, legible at 24px favicon size and at hero scale.
- **Imagery rule (absolute):** no photos. All illustration is CSS/SVG. This is a constraint from brief §3, and it is also the aesthetic — the flatness is the brand.
- **No gradients on text.** Ever. (AA contrast commitment — gradient text cannot guarantee a ratio.) Decorative gradients are avoided entirely; solid tokens only.
- **Voice of the copy:** warm, courteous, immaculate — "the brothers" tone. Short sentences. The Caveat tagline is the wink; everything else is the handshake.

4 · RESPONSIVE BEHAVIOR

Two verified breakpoints. Mobile-first CSS; the 360px layout is the default, 1280px enhances.

	360PX (MOBILE)	1280PX (DESKTOP)
Layout	Single column, full-width sections	Max-width 1200px container, centered

Section padding	40px (space-5)	64px (space-8)
Hero headline	Display 40px	Display 56px
Header	Logo + hamburger; CTA stays visible	Full nav inline + CTA
Value-prop trio	Stacked	Three across
Menu categories	Stacked	Three across
Location cards	Stacked	Three across
CTAs	Full-width buttons, min-height 48px	Inline buttons, min-height 44px
Form	Fields full width, 16px+ font (no iOS zoom)	Two-column for date/guests pair

> **Non-negotiables:** no horizontal scroll at either width · touch targets ≥ 44×44px (48px on mobile) · body font never below 16px on inputs (prevents iOS auto-zoom) · the SAMPLE banner and footer microcopy visible without scrolling sideways at 360px.

5 · ACCESSIBILITY NOTES

- **Contrast:** WCAG 2.1 AA on all text. Verified pairings in §1.1 — every ratio re-checked against the final tokens (brown on cream 11.74, cream on red 6.43, brown on yellow 8.08, cream on red-dark 9.98). Orange is decorative-only: brown-on-orange (4.26) fails, so it never carries text.
- **Keyboard:** skip-link → header → main → footer order; visible yellow focus ring on every interactive element (§1.5); Esc closes the mobile menu and returns focus; accordion is native `<details>`.

- **Forms:** real `<label>` elements (never placeholder-only), errors announced via `aria-describedby`, focus moved to the first invalid field, success confirmed in a full panel.
- **Motion:** no autoplay, no parallax. `prefers-reduced-motion: reduce` freezes all decorative animation (sunburst, hover lifts keep their end-state, no transitions).
- **Semantics:** one `h1` per page; landmark regions (`header` / `main` / `footer` / `nav`); decorative SVGs carry `aria-hidden="true"`; the chicken logo has an accessible name.
- **Touch & readability:** 44px minimum targets (48px mobile); 16px minimum input font; line-length capped at ~68 characters for body copy.

★ SAMPLE — FICTIONAL CLIENT, ILLUSTRATIVE ONLY ★
